Day 04: Script Execution Permissions

Name: Nevesh Gokul M J

Department: CSE

Script Execution Permissions

Objective :

To change the file permissions of the script /tmp/xfusioncorp.sh to 755 on the stapp01 server.

Steps Performed :

Log in to the server: Connect to stapp01 using the command `ssh tony@stapp03.stratos.xfusioncorp.com`.

Change file permissions: Use the `sudo chmod` command to set the permissions to 755.

- Command: `sudo chmod 755 /tmp/xfusioncorp.sh`

Verify the change: Use the `ls -l` command to confirm the new permissions.

- Command: `ls -l /tmp/xfusioncorp.sh`
- The output should show `-rwxr-xr-x` at the beginning of the line, which corresponds to 755.
